How Many Miles in a Pair of Hose?

GOTHAM GOLD STRIPE'S

MILEAGE CONTEST WILL SHOW YOU!

To emphasize the splendid wearing qualities of our newest Gothom Hostery, we asked 11 business women to wear them, with pedometers, day in and day out to test mileage in each pair ... you'll be amazed at the mileage chalked up by these re-markable new hose.

Here is a dering demonstration of Sheer Crepe Goth-om Gold Stripe Hosiery. No longer will you have to fret and worry about how much werr you can go on your hosiery—McNabb's is making an actual pedameter lest to show you just how much war-you can get out of these splendid hose, "priced from

ADULTS AND CHILDREN

It would seem that the objection to radio horror dramas and thrillers for the sake of children, might be applied to adults after last Sunday evening's too realistic fiction of the attack on earth by strange denizens of Mars brought to this globe in meteoric capsules, when adults rather than children ere caught up in the sweep of the play. Children are often reported so impressed ed. Adults were caught in the same way the thought of security and protec The child fears a pictured monster the adult a devastating army.

ORTON WELLES, ACTOR, WAS SO RE-ALISTIC IN H. G. WELL'S fantastic story of an attack on this world by the men of Mars, over the radio Sunday night, that many radio listeners took it as a fact that many radio listeners took it as a fact that this world was attacked by another world, as Two-World War, as it were. The radio play was dramatically staged with realistic news broadcasts and all the accompani-ment of a modern enemy raid. Result was ment of a modern enemy raid. Result was almost a national panic in the United States. The broadcast was not carried on the Canadian network where Charlie Mc-Carthy held the principal stage for those who forgot to go to church. Thousands sat and laughed at a hunk of wood when they could have been listening to good sermons.

The Show Windows of the Nation

The merchants of Canada have played an important part in national development. They were in the vanguard of colonization; their business is the axis on which modern trade and commerce revolve. Every merchant's progress and the value of his

service to the community have depended at all times on his ability to keep prospective customers informed of the kind and quality of the goods he could supply. Advertising has been essential to the profitable conduct of his business.

The efficiency of the local daily newspapers as advertising media has been demonstrated more and more conclusively as markets have expanded and the variety of competitive goods has increased. Today the most successful merchants are those

who advertise their products consistently and frequently in their local newspapers. They know the newspapers maintain an intimate contact with every home and that every consumer depends on his daily newspaper for reliable information concerning goods and services available.

Consequently, the divertising columns of the Canadian daily newspapers have become, in a very real sense, the show windows of the nation. They influence the purchases of more than two million families every day.

cation is to be one of the met Popular aducation is to be one of the meth-de of attack on concer tell in Canada. A procerted program of publicity will be spon-ored and medical groups will be set up in il large hospitals for the detailed study of cords of cancer cases. These decisions will be supported by a drive for membership among laymen and the medical profession and by the publication of a quarterly maga-zine by the Council of the Canadian Society for the Control of Concer.

12,500 and more Canadians die of cancer one disease or group, diseases of heart and blood vessels alone claiming a higher oid blood-vasats alone claiming a higher death total. It is being impressed upon the people that they must have a knowledge of the "Wearing signs" of concer and the press and other opencies how the duty of corning this information to the public. In concer, time and diagnosis on supermuly important higher interests of the pression of ath total. It is being impressed upon the

conde and famous training. There is one encouraging sign. Research into the secret of concer is proceeding at the some time as the bottle against the toll of the disease, Some encouragement is being given by findings. Experts are defining their whole time to the investigations into the disease, one encouragement is being given and some hore begat that one document to the control of the three diseases and some hore begat that document is the disease of some begat disease. It is well that the cause of research is being supported by publicapitate man, and institutions and by this work of self-socrificing experts.

perts. The great cause of the war against cancer is deserving of every pupport for the sake of suffering Jumannity, for those who can be saved by early diagnosis and treatment, and by reison of the ultimate hope that the mystery of concer may be discovered. All agencies must work together, and with them the public whose cooperation means a great deal to the success of the efforts.

INCIDENT RECALLS ARMADA

It is a long long time since Spanish ships figured in a bombordment off the coast of England. On Wednesday of this week an armed Spanish insurgent motor cruiser the Nodir, come ocross a Spanish freighter, the Contobria, and battered it off the coast of Norfolk the crew being soved by the armed cruiser, a liteboat and a ship.

the sinking of the freighter by the insur-gent motorcruiser Nodir was a one-sided in-cident, quite unlike the Amodo's defeat, though the movement of Sponish vessel so for from General Franco's ports would indi-cate on tempt to raid on shipping carrying munitions and supplies to the Sponish gov-ernment forces.

SIDELIGHTS

THE PLOUGHMAN

In the grey light of the November morn He guides his team across the silent field, With steady hands he holds his trusty plough That the dark furrows to the shore may yield; And as he tolis throughout the dull, drob day Who knows what visions o'er his heart hold sway?

His team keeps time to the dull hours slow po v pace on leaves whiri before the freshening

gale,
The shadows lengthen and the night drop Showing the stars at first all dim and pale, Then homeward turning from the furrows

He feels himself a partner with his God.

"NATIONAL CHEESE WEEK" BEGINS NEXT MONDAY NOVEMBER SEVEN, and that should mean a great deal to all Canadi-ons. Citizens of Belleville and district should sit up and take notice of the importance of National Cheese Week to the people of this city and district. Over one million dollars this year came into this district through the cheese industry. Farmers benefitted, merted directly or indirectly with those directly concerned in the manufacture and sale of GOOD OLD BELLEVILLE CHEESE, the cheese known for its superior quality 'round the world. The least we can do in honor of this event is to eat more cheese, especially National Cheese Week. Canada can afford to step up its annual cheese consumption which step up its annual cheses consumption with moments, to only 34% pounds per capits per annum, as compared, to Switzerland's 23 pounds per capito, per annum. Look what a fine, healthy physicuse the Swiss have. Germany comes such with 1175 pounds, and deline, healthy physicus the Swiss have. Seriamy comes are with 1175 pounds, and collection of the serial pounds and the serial pounds of Conada with 1975 pounds per capital per annum, which makes the cheese for English consumption, with 975 pounds per capital per annum, and the serial pounds per capital per annum, and the serial pounds per capital per annum, which makes the cheese for English consumption, with 975 pounds per capital per annum. Canada in cheese consumptoin with almost five pounds per capita per year. Canada with less than four pounds of cheese per man per year should EAT MORE CHEESE and try and lead the world in cheese consumption as it does in cheese manufacture. On your mark, Canada.

The Story of OD and AD

OD and AD were machinists many years ago. One day, at a fair, they saw a buggy with an eogine in it. They saw many ways to improve it, and each decided to build an automobile. But when it came time to sell their first cars, OD and AD had different ideas.

and the AUTOMOBILE

How OD Tried to Sell His First Automobile

OD invited all his friends and neighbors to his house. He drove his automobile around the block and gave them a ride. They were thrilled. They rounted to buy it. But when they learned that it cost \$3,000, not one of OD's friends could pay such a high price.

How AD Sold 10 Automobiles

AD had also spent nearly \$3,000 in building his first car. He knew that only a few people could afford so high a price, and to find them he must show his car to a great many. So he advertised that he would demonstrate his ear many. So he advertised that he would demonstrate his ear many. So he advertised that he would demonstrate his ear mound. AD ran his ear up and down the street. Afterward, ten men wanted it. AD told them that by making ten cars he could cut costs and reduce his price to \$2,500. So he hired several men, rented a building, and started making more and better automobiles.

How OD Finally Sold a Car

OD heard that AD had sold ten cars, so he decided to try again. When his second car was finished, it had cost him almost as much as first. He showed it to as many people as he could see and after a long time sold it for just about what it had cost him. In the next five years OD built several more automobiles, but always by the time his cars were finished AD was making better cars for lower prices.

How AD Sold 10,000 Automobiles

AD decided that if he could make cars by the hundreds, he could lower the cost and add still more improvements of the cost and add still more improvement of the cost and the cost of the

By 1911, AD was making such a good car for \$1,500 that he sold 16,600 that year,

Why OD Gave Up Trying to Sell Automobiles

OD now saw that he could not possibly make cars at low cost by building only a few each year. Nor could he sell enough to make more by telling people about them one at a time. So he decided to go back to work as a mechanic. He applied at AD's factory and was promptly employed.

How AD Sold Millions of Automobiles

AD now realized that there were millions of people who would buy his automobiles if the prices were only lower. He also knew that if he could build hundreds of thousands of cars a year, he could make them better and at less cost. So he enlarged his factory, employed more men, and advertised to millions of people all over the country. By 1921; he was making a fine-looking car with a six-cylinder motor and a self-starter. And the price had been reduced to 51,000.

AD's profit per car was now very small. But he sold so many cars that his business was successful. And, as prices became lower and lower, millions of people who had never dreamed they could afford automobiles were able to own and enjoy them.

By 1938, AD was making the best and finest looking car he had ever built—and the price was only \$750.

AD Tells OD How It Came About That

ONE DAY OD went into AD's office at the factory. OD said, "Remember the time we saw the horseless carriage at the fair? Who would have believed that in 30 years almost every family would have an automobile!"

AD said, "It never would have been possible without advertising. All the advances in manufacturing would have been futile without advertising to tell the story. As it helped us to sell more and more cars, we were able to make them still better and sell them at lower prices. As a result, the advantages of an automobile are now enjoyed

by people of small means just as they are by the well-to-do."

"But you spend millions for advertising," said OD.

"Yes," said AD. "But we sell so many cars that our advertising costs only about \$15 per car. That is, not much when you remember that in 30 years the average price of a car has been reduced by more than \$1,500. So, advertising has really helped to reduce prices and year after year has, helped make it possible for millions of people to have better cars for less money."

I Car ariou rives above for 1911, 1921, and 1938 are the approximate average of now our prior in these years.

A TRYST WITH YOUTH
Today, as the November light grows dim,
My thoughts are vagrant, wandering clor,
Leoping beyond the years all post and grim
Toward the portal of a distant stor,
That lurse me on with restless flying feet
Where youth and joy were wont to make re-

I wonder as the fleeting snow-flakes fall, Do you recall the time so long ago, When in the grey and grim old college hall We reckless were of winter's frost and snow When all the future seemed like summe

With not a cloud to shadow or to blight? And when at last the college days were past We filled the train that night with laugh and

cheer,
A merry crowd, destined to part at last
so sever friendship's ties now grown so dear,
flow tender were the goodbyes that we said,
The lingering hand-clasp and the tears un-

ATTENTION, WOODSTOCK SENTINEL REVIEW!—Cheese is still King—Belleville Cheese—want to make anything of it?

WHY EAT CHEESE? A fair question. Here's the answer, brief and occurate by an English Professor of Public Health and Hy-

"Cheese is composed of all the solids of milk, except the sugar. A few drops of femmen, colid erment, is able to curdle and thicken a large quantity of milk, in a short time . . Cheese is really a concentrated form of milk, for one pound of cheese is produced from one gallon, about the pounds of fills. It is thus specially rich in fot and protein. Old cheese is very digardition, perfectly more before being earth. NOVEMBER

Typical November days did not open this

month.

Dante Gabriel Rossetti, described November in his "Autumn Idleness",
"This sanlight shames November where he

grieves In dead red leaves, and will not let him The day, though bough with bough he

overrun.
But with a blessing every glade receives
High solutation."

Shelley paints the usual approach of win-and sums up November as only this lyrist

can:
"The warm sun is failing, the bleak wind is "The worm sun is tolling, the block wind is welling, the bote bought are sighing, the pole flowers and the year On the earth her deathbed, in a should of leaves dead, is lying. Sunshine is one of the gifts of gature to this part of Conada even in the month of November which is overcast in many parts of site world. November has its riches in taggle changes from cloud to sun and from sun to cloud. Nature is of course more wan than usual as calors have largely foded from the

WHERE DOES ALL THE MONEY COME FROM?

M ORE than four and one-half million depositors in Canada have "money in the bank."
They are satisfied to leave their money on deposit because Canada's chartered banks are ready and able to pay back promptly every cent when the depositor

These deposits in the chartered banks total roughly \$2,262,000,000 – approximately 10 per cent. of which they carry in cash—in other words Bank of Canada money or "legal tender."

ne people do not fully understand banking tions and might ask: operation

1. What have the banks got to represent our deposits if they do not have it all in each? 2. How can the banks reper our deposits, over \$1,363,-000,000, with the amount of each they hold?

hareholders.
That should answer your first question satisfactorily. And now

question anisfactorily. And now for No. 2:
Look again at a benk balance abeet and you will see that in addition to the cash it holds, the bank owns assets quickly convertible into eash, or which can be used to borrow from the Bank of Canada.

Experience has taught banks he amount of cash it is necesthe amount of eash it is necessary to earry to meet ordinary day to day demands, and also the proportion its necessary to carry in gilt-edged quick assets which can be liquidated to meet even any extraordinary demand. Banks know that it is absurd to expect all depositors to call for their money at the same time.

It would be hard to convince any wage-samer or amy pro-ducer of new wealth, that his deposit which arose from his labour and production, is any-thing but real money. He knows better, for he can buy things with it. Where does all the money expect all depositors to call for their money at the same time. That would be like saying that if everybody got sick at the same time there would not be room in the hospitals to take

or that if everybody who travels by street car decided to travel at exactly the same hour, there would not be enough cars here would not be enough cars o carry them.

Or that if every person who surries life insurance died on the ame day all the claims could not be met.

Where does all the measy cons from? Your deposit is the measure of your own real wealth. On the marketing of your labour for wages, from the application of labour to the soil of the farm, or to the standing induce in the forest; from the settling of and minerals from the ground; from the factoristic of the standing of any minerals from the ground; from the factoristing of raw marketing into manufactured goods; and Or that if every sea were rained dry there would be no

A Change in Your New Directory

The "F" following party-line telephone numbers has been changed to "R" in the new telephone . directory, just distributed.

This change has been made with a view to improving telephone service. It has been found that the letter "F" often sounds like "M" when spoken over the telephone.

We urge all telephone users to consult the new directory before calling a number.

IN MEMORIAM Ber

ETHIER—In loving memory

The one we loved was called away, God took her home, it was His will, But in our hearts she liveth still. —Beloved daughter of Mrs. E. Holat. , m3-12

HOWARD—In loving memory of our dear mother, Mary Matilda Howard, who passed away one year ago today, November 8, 1927.

Peaceful be thy rest, dear mother, It is sweet to breathe thy manne, In life we loved you dearly, In death we do the same, —Sadly missed and always re membered by her Husband and youngest son, Thomas and wife. n8-1

We are said utility our memory, Lonely are our hearts today. For the one we love so dearly Has forever been called away. We think of her in altena, No eye may see us weep, But many silent tears are shed when others are asleep.

—Badly missed by daughters. E

Announcing the NEW FORD V8 CARS for 1939

GREATER VALUE for every motorist has been built CHEATER VALUE for every motorist has need must into these two new Ford V-8 cars for 1939. Both bring new meaning to the familiar Ford phrase—"The Quality Car in the Low-price Field!"

—The Quality Car in the Low-price Field:
For here is real progress in motor-car manfacturing. Here are two new cars that give further
expression to the forward-booking policy of the
Ford organization . . . traditional Ford dependability and economy combined with notable advances in modern, progressive engineering. The
Ford way of doing things is the reason for the
greater value in the two new Ford cars for 139.

greater value is the two new Ford cars for 1993. Each car has been given in own distinctive appearance, yet each reflects Ford leadership in design. Both bring you something of the fine streamlining of the Lincoln-Zephyr—recognized style leader for the industry. The interior appointments of the 1909 Ford cars are epsecularly rich and see in keeping with their beauty of line and contour. Every detail is asyled for good turns and good service.

Both are big, roomy cars, equipped with hydraulic brakes and powered with the 85-horse-power V-8 engine that gives you so much extra power, amothese and efficiency. This year, the quiet performance of the V-8 engine has been natched by the new quiet built into every part

The 1939 Ford cars bring you greater riding case on every road. New seat construction, flexible cantilever transverse springs and double-acting hydraulic shock absorbers give triple-cushioned

hydraule shock automote priding conflort.

Both Ford cars for 1939 are Ford-priced for greater dollar value. From humper to humper, inside and out, they are the most outstanding cars in all Ford history.

STORY OF CHINA WINS PRIZE

It is with pleasure that a large part of the world read that Pearl Buck has been awarded the 1938 Nobel Prize for Literature for o ork on China, named "The Good Earth" hich-was itself the Pulitzer Prize winner in 1932. The reason for more than ordinary in-terest in the award is the fact that this deals with life in China, for the outhor, who is the doughter of missionaries, was herself a teacher for ten years in the University of Non-king and also in the Southwestern University and Chung Yang University in the some city. Pearl Buck, who is Mrs. Richard J. Walsh in private life, knows the life of China and is shelf for self a fune start. Her works are must private life, knows the life of China and is able to tell a true story. Her works are nu-merous and furnish the world with a picture of the difficulties of life in that great Orien-tal country, which has had its full measure of sorrow through nature's cataclysm and through war. China has not had a chance in the war still raging. In the book she has the full chance of telling her sad story to huma-

nity.

It is not every book that can be turned into theatre or made a success on the screen, but that is what "The Good Earth" has ochieved. It is a success in motion pictures. Peor! Buck's works are widely read and they deal with practical focts of life as they are experienced today. China has an interpreter in her and it is well to see that inter-preter honored by the famous award.

JEWISH PERSECUTIONS

One of the stronge facts is this that the Nazis who submit to the iron will of Nazidom and bear without comment the land imposed on them, would take out vengence on a small minority, which could not possibly af-

Word is from Germany that the old time gheitin life of the Jews may be enforced. In the middle once the gheiton bound the lever, first to Italy and then in other lands. In these the Jews were compelled to remain and not to do business without. New German lover would limit the number of stops and restrict Jews to trading with Jews within

Thin, phontom strains that but the heart can

Faintly the echoes come, then die away, For Summer is a dream of yesterday; No more she strays o'er field and hill and

plain, Where Autumn flaunts her robes of crimso

Where Autumn Hounts her robes of crimson stain;
In vain we seek for Summer's robes of light She's passed beyond the range of human sight,
And only echoes reach the heart to-day —
Echoes of footsteps that have passed for aye.

"CALIFORNIA HERE WE COME" used to be a phrase indicating that the attractions of the Golden Gate and the Valley of the of the Golden Gate and the Valley of the Moon could not be resisted by enyone who had the cash, the time and the inclination to start westward on thou, no handsock, in constant waterward on thou, no handsock, in constant waterward on thou, no the constant of the constant waterward on a coacisional tourist riding after rads or blind bagagage. California welcomed the world until the , depressor, then it got so many newcomers, without coash that clients, and without the coash that clients, and without granted has become the lides. lopies. So widely spread has become the idea that California is Utopia that there is a gen-eral drift thataway by thousands upon whom life has not lavished many favors. Sinclair's end drift thataway by thousands upon whom the hard bright and the son's Sinclair's EPIC, meaning End Poverty in California, was a considerable of the son's since and the since and the son's since and the son's since and the pagne class. This ambitious movement actu-ally reached the polls, propelled thither by a ally reached the polls, propelled thither by a legal petition containing more than a million names. However, it died at the polls last week, and the only ones who wan were the promo-ters. There seems to be such easy pickings in Collifornia that the chanse "Collifornia Here We Come", is no doubt being practised now acadiously by slick gritichquickers from Maine to Montrou and before long Collifornia-cies of the control of the control of the propelled of the control of the propelled to the control of the people to get rich quick on.

NEW ANTI-JEWISH LEGISLATION

The new German decree which admittedly is aimed towards the elimination of the Jew ish people from the national life of German is one of the most repressive measures on a race in history. Prohibition of participation in any way in the commercial and social life of the Reich indicates to what extremes Germany has gone in her attempt to crush these people. Arrests and committal to detention camps which way to follow will entail suf-fering of the bitterest type with separation of

nembers of families. Persecution of these people has stirred humonity. Latest is the program following the assassination of a German diplomat in Paris, allegedly by a Polish Jewish youth, madden-ed by the persecutions which have come upon his race and his religion. The assessment of one billion marks or four hundred million dolfor the assessination of wealth. Months to form of confiscation of wealth. Months the earlier stages of the restrictions on the Jews the view was expressed that the exiling of Jews might result in confiscation of property and wealth.

People who are not Nazi Germans cannot what justification there is in inflicting see who'r justification there is in inflicting the penalty begainst people who in no way had anything to do with the assassination. There is no evidence shown of plot and the shooting has all the evidences of the act of an individual, not of a group. The tide of indignation and of the sense of shome is rising _steadily throughout the world that any notifier should tyrat do that any notifier should tyrat days as the Jews have been treated as individually as the Jews have been treated as individually and the stead of the sense have been treated as individually as the Jews have the same that the same that

s and as a people. These latest developments in the world These lotter trengthening in the world strengthening the minds and hearts of the popular of the Christian notions in their criticular works the Nosis, or a time when efforts are being mode to find purantees of poocs in the world out on the notion of their criticular world out on the notion of their criticular poocs. A STITCH IN TIME

"A stitch in time saves nine," Grandmother said, Holding her needle up

To catch the thread, Peering at me above

The quaint steel rim Of spectocles as bright As serophim:

"A stitch, you know, my dear, If done in time.

Thon will nine." "Yes, ma'am," I'd say politely (As all good children should);

Nor drop the smallest word to hint i had not understood ---"A stitch in time saves nine,"

She'd nod, and tie a knot -While I, a wriggling question-mark Was wondering: Nine what?

THE CIRCUS SMELL It is pleasant to learn that the labor troubles which struck the Big Top last June have been settled and that, like the June hove been settled and that, like the robin, the circus will return next Spring "bigger and better than ever." It is pleasant to hear the enthusiastic prognostications of a new and more stupendous show, modernized with dezzilia color effects and the magic of light. All this is in the good, eld circus tradition of diglectival volume and velocity. But there is one strange

Some and velocity. But here is one stronge and ominous note.
The circus, it seems, is to be air-conditioned. That is dismal news, indeed. An olfactory appeal which has taken centuries to compound is to be swept away in one devostating breath of ruthless sonitation. Who wants access of a circus? It is the whilf but the learning to the compoted into the entrancing observations of the compoted with the entrancing observations. There is nothing as evocative in the world. A man old and blind would thrill to it and know he was a boy again woiting breathless for the big show to start.

To those who did not get started with Volume 1, we wish to say that the entire series of Ten Coupons will be repeated in The Standard. If you have not begun to get these books you can start now.

HESE ton volumes, written and edited by authorities, are up to date. The 3,800 pages contain 3,000,000 words, covering over 40,000 subjects clearly. They have hundreds of illustrations and maps. The oks cost over a quarter of a million dollars to compile, . Never before in Canada has such fine reference work been offered at such a low price. They will make a handsome addition to your library, and a con-stant source of help and interest to your whole family for years to come.

When harvest gold is gleaming
O'er surny slope and plain,
And Sumper winds are wooling
The heart to roam ogain,
Then dreams long since forgotten,
And hopes that stirred the soul, Come in a throng of mem
And o'er my being roll,

The leaves that sing of Summer
The fields of golden wheat,
The waves, that lave the share line,
All bring a message sweet;
And all the old-time catasy,
That reigned within my heart,
Come being in cludious memory.

That reigned within my hear, omes back in gladsome memory And forms of life a part,

For oh! the dreams and visions
That filled each summer day,
Were parcel of my beling
And ne'er have passed away;
The autward life is seeming—
The labor, care and strife—
But thoughts, ideals and visions
Make up the sum of life.

SAYS THE OLD SOLDIER: Some people keep saking ailly questions. Frintatane, if Great Britain is at wer is Canada is a war If Canada is a part of the British Empire, can part of the British Empire, be at war without the other part? If your right ism's at war can your left arm be nestral? If you right is at war can your left arm be nestral? If you kink an enemy with your right foot can you cares the same enemy with your pleft foot? Den't be ailly.

WALKER STORES, LIMITED

Great Three Day Event Thursday, Friday, Saturday

We have endeavored to put into every home in Belleville a four-page circular, describing eighteen seasonable lines of merchandise, at exceptionally low prices for our Great Budget Balancing Sale -Thursday, Friday and Saturday.

We could have had printed a circular twice as big, and yet not been able to describe all the moneysaving lines that will be displayed throughout this store. On both floors, on every counter and display table, ODD LINES, SPECIAL PURCHASES, AND DISCONTINUED MERCHANDISE will be shown at prices that will convince our customers that they are saving money at this 3 day sale.

Our display windows will contain Tonight representations of as many of these great values as they possibly can and whilst you are looking at them, or reading about them, remember there are many more all through the store, so come prepared for a feast of savings.

FALL PLOUGHING

The men who plough in Springtime see Small growing things 'ere long, But men who plough in Autumn time Must have great faith and strong.

The long upturned brown rows of sod Are flanked by second grass, And wild geese flying toward the South Honk gravely as they pass.

Men urge their tired beasts along With confidence elate, Under a grey and sombre sky Light fades; they cannot wait,

Then they must look owey beyond
The high white hills forlorn,
And through Frost's by fingers see
Another Spring reborn.

TRUES THE CONTROL OF THE STATE OF THE STATE

Like many other men busy with day to day affairs, Mr. H. did not readily see the wisdom of providing for the future protection of his estate. Present day problems seemed more

But the advisability of taking definite steps was practically thrust upon him, he frankly admits, when he was called upon recently to help the widow of a late friend. It was, unfortunately, the usual case of a wife's inexperience in present-day business matters. The estate had been without a Will and in short order a self-appointed adviser gained her confidence and most of the estate was lost in "sure fire" investments.

Common sense, as Mr. H. now explains to his friend, made him realize that his own estate matters should have prompt attention and he wrote us for information about our management of estates and the cost.

He has made a properly planned Will and appointed us to be his executor and trustee.

Ask for our booklet on our services,

WITHOUT ONE FATALITY!

A MAGNIFICENT RECORD ... in one year, men, women and children travelled a total of more than travelled a total of more than eighteen billion miles by rail without a single passenger fatality as the result of a train accident!

With trains running on faster schedules with trains running on faster schedules than ever before, this is a tribute alike to railroad men and to the dependability of all railroad equipment. It is proof, if any could be needed, that the railroads take no chances with the equipment upon which the safety of passengers depends. And it is significant that for operating the signals that make today's higher train speeds safe, as well as for

car lighting, air conditioning and other vital services, the country's leading rail-roads depend upon Exide Batteries.

With the experience of the railroads to With the experience of the railroads to to guide you, there is no need to take chances when you require a new hattery for your car. Voice when you require a new hattery for your car. Voice when you their dependability for nearly half a century in many vital services. Is there any other hattery that so there are you there hattery that so the thoroughly merit; your confidence? Exides are priced for every encounter. Looks for the merar Exide dealer—symbol of honest service.

MUNICIPAL NOMINATIONS

Another municipal year has rolled around and on Friday, November 25th, nominations will be held for the majoralty, aldermanic seats, public utilities commissionership and public school trusteeships. Ten days later on Annday December 5th elections

There is expected the usually large num-ber of nominations for the offices, which will provide spirited contests should a sufficient number of the candidates decide to contest

For the best administration, wholehearted interest in the nominations and elections on the part of the citizens is a necessary factor.

ANCIENT CIVILIZATION IN AMERICA

The oldest culture yet found in Southern The oldest culture yet found in Southern Colifornia has been reported, by the South-west Museum. It is in the Palos Verdes hills where primitive man is shown to have lived shousands of years ogo. Clam shells, mortars, pestiles, arrow heads and primitive playthings have been discovered, indicating four distinct cultures. A lind of Santa Borban some time ogo, set of 6,000 close 20,000 agens old, is be-lieved to be a lotter culture than those now re-

ported.

The 'earliest Californies' sharted cookles, cove system, scollops and other shellfish with round stones, and elfer no sign that he cooked the shellfish, of text in the shell.

It is not stone, and offer no sign that the cooked the shellfish, or text in the shell, and the shell is the fact that opposite cooking the rought located stones have been found, indicating an early knowledge of water cooting the rudest tools.

E. F. Walker, head of the research party who mode the find, believes that "these men curried of this high conclusory overfooking the owner of the shell is the shell in the shell in the shell is the shell in the shell in the shell is the shell in the shell in the shell is the shell in the shell in the shell in the shell in the shell is the shell in the s ocean with their culture already developed. Where they came from no one can say definitely. They are obviously of Mongold (Asiatici) origin, because discoveries in this region brought to light rolling stones—playthings—similar to those in Hawaii and the Polynesian

Concerning the strata, Walker says the Concerning the stroto, Wolker soys the first were evidently seed-cetter, using colicinal shells for cooking, and, having granite grindstories and morter slobs. Two feet higher brought a stratum which indicted a race which cremated the dead, played games with pointed stones, and had imported volcanic rack from a great distance. Above them in the third stratum were traces of men who had a printliver "poker chip" for their games, and ceremonial bowls with stone bottoms and used arrow heads. Above this in the next stratum were found beads of glass, such as the Sponiards sow worn by the Indians at

SUSPENDED ANIMATION

The idea of suspended animation through cold has been a tertile field for romancers. Readers may recall the story of the frozen plrate crew brought to life. No biologist ac-cepts as fact the tales of fish and frogs which have been frozen through and brought back to life after being thowed out. Some nave be-lieved the stores of the fish and frogs but no one ever believed the stories of frozen pirates ing when the bodies were warmed though tory did give a tremendous thrill,

But the principle of suspension of anima-ion through cold has a basis of truth-Micro-organisms which have been plunged into cold hrough application of the principle involved through application of the principle involved in lifusfaction of gases are shown to cling more tenociously to life in the lower and lower stages of life.

In Ontario 24,000 employers come under the jurisdiction of the Workmen's Compen-sation Board.

Since the inauguration of the act in 1915 \$125,000,000 has been paid out in compen-sation for time lost, or medical aid.

As an indication of the vast amount of work performed by the Workmen's Compensation Board it is said that between 200 and 300 accident cases are reported to the board every day, and since the act was passed more than 1,300,000 persons have filed claims.

More than 100,000 people receive benefits each year, and 10,000 are receiving pensions for life, some for total disability and some for partial disability.

Widows receive \$40.00 per month until they die or remarry, and if they have children an additional ten dollars per month is paid until the children reach the age of sixteen.

An interesting phase of the work of the Workman's Compensation Board is the establishment of rehabilitation groups—re-establishing injured and crippled men to industry.

Silicosis, which affects miners, is responsible for more than 25,000 chest X-Ray pictures of miners, and annual examinations are made of these men.

"Fortunately, as place in the life of Conodo. "Fortunetely, as choimmen he was oble to play on most im-portent role in planning and exponiting the Commission's work and to take an octive part. The way in which he carried out these duties on the respect and administra of Conodi-ous, everywhere," Mr. King sold.—Conodiess will join with the Prime Mini-ter in his with that the millinequishment of the conodiess will expedite Mr. Rowell's re-covery.

Covery,
Hon, N. W. Rowell has been an outstanding Canadian for many years, with a deep interest, in public life, a record of brilliant service at the bar. He was appointed Chief Justice of Ontario in 1936.

MORAL REARMAMENT

Ex-President Herbert Hoover of the United States, expressed the need of moral rearma-ment, "something far more than inhibitions, prohibitions and laws" as a vital need of the orld today. He was speaking in Toronto be-ne the York Bible Class. Mr. Hoover said

prohibitions and low's "as a vital-need of the world today. He was speaking in Toronto before the York Bible Class. Mr. Hoover said that his need would be met by nations whose low the properties of the properties. The world has come to notice that desiration and security. That there is such a thing as insecurity is clear enough from recent events in China, Spain, and in other has no friend would be in a precent as the first world has really been confounded in the post five years with the threats of war and actual wers which have been woged, and the post five years with the threats of war and actual wers which have been woged. Mr. However sees "the fumer from these widelings of the conditions of new idealogies, as today throughing our democracies with lituations of the conditions of the condition

economic security."

The ex-President also pleaded for a larger opportunity in the democracies for the economically less competent. He sees a slackening all over the world of individual responsibility and personal conscience and to be halfing all over the world of individual responsi-bility and personal conscience and so he holds up the ideal of a constructive progress of civi-lization in the democracies as founded on the advance of truth, beauty. Human brother-hood. "It is founded upon respect for the dig-nity of individual men and in large view we have made great progress over two centur-les".

The gray smoke clearing from the volley-The blind man's top along the street The legless beggar or his trolley, The tramp, tramp, tramp of metal feet.

Oh, will men sigh and will men look As now they look (while they still can) Into an old romantic book About the dappled dawn of man?

In New York Times. LLOYD FRANKENBERG

HITLER PUTS A PRICE OF NEARLY HALF A BILLION DOLLARS as the value of the life of one German. This is the man who com-plained long and loud that the war indemnity imposed upon the Germans by the Treaty of Versailles was monstrous. If Germany had won the World War and a man like Hitler had had the dictating of terms the Treaty of Versailles would have looked like a full cours dinner for fifteen cents menus in comparison to a Hitler indemnity.

VALUE -Proven by Experience

For 70 years the Fenmans label on Knit Goods has been an outstanding symbol of value. A trademark that the buying public has learned to associate with fine quality, correct style and enduring comfort.

Penmans '95' Underwear is typical of these qualities. An undergarment that has won the approval of generations of men and bors, because of its health-protecting warmth, comfortable, well-failored lit and long wear.

Available in shirts and drawers and union suits in-cluding the popular NuCut style for Men and Boys.

Engineered with New Riding Comfort

FOR 1939—Pontiac introduces two great new sixes with captivating new styling and at prices so startling that All Canada will sit up and listen.

The long, low Pontiac "Arrow" with its "magic carpet" ride . . . silent, flowing magic carper rice . . stent, nowing power .. superb handling case ... and new Unisted Turret Top Bodies by Fisher ... is yours at a cost never before possible ... a price that compares with the lowest.

In the Pontiac "Chieftain"—without leaving the low-price field—you enjoy motoring advantages offered only by much higher priced cars. The new "Chieftain" models combine the utmost in rugged construction with new advanced features such as Rear Coil Springing.

Both cars have been engineered with an

entirely new kind of ride that spreads a "mangic carpet" over the roughest roads. Both have wide doors, level floors and provide the restful comfort of drawing rooms interiors—you can actually lounge. Both cars are so wonderfully easy to drive—marvels for their. You're safer and feel after in a Pontiac. You feel marst and are smart—in a care that has the power and appearance of an aristocrat. Three's no question about if! No other car is to well requiped to plean both your price and entirely new kind of ride that spreads a

Just study the list of features shown to the left. They just begin to tell the Pontiac story for '39. So before you decide—see and drive Pontiac—which the convenient terms of the General Motors Instalment

Come and Hear the Affairs of Your City Discussed LADIES CORDIALLY INVITED.

To the Electors of the City of Belleville:

I have been urged by many citizens to offer my services as Mayor for 1939. I appreciate the honor done me by these requests but it is still with resiscence that I have fell it a duty to present my-self as a candidate. You have elected me as an on for the past 5 years, and my record in the Council is open for your judgment.

I do not advocate or desire drestic changes in our present system of civic administration, nor do I think any substential reduction in the present tox rate can be obtained by reducing expenditures with in the control of the Council without satiously in-pairing municipal services furnished to the citizens. pairing municipal services furnished to the citizens.

I firmly believe that at least a portion of the present cost of education should be lifted from real estate cost or education should be littled from real esta-and will support any organized movement that shows possibility of practical results along this line. I am convinced, however, that the necessary reforms and amendments of Municipal law and finances can only be achieved by the action of responsible groups in the Legislature. If elected, I shall try to keep capital expenditures down to the minimum, comwith necessity as I have done in the past. to men of this kind who stand at the will of the people to serve in whatever position they may be voted into. Elected candidates are naturally eloted and have a right to be proud that the voters have chosen them. But with-out the defected candidates, they would never know yhot public appreciation in votes amounts, to, it is true that many a man't is also to a company of the property of the proamounts, to, it is true that many a mort is given an occlaration sometimes year offer year which is a mark, generally of the publication of the public endease conditions in that they know they have public endeasetion after for their stand on issues or or their publicity, by the same conditions are desired on the publication of the pub where there is a paramount issue. And all cannot win when there is a limited number

It would be the aim of education to make men first, and discoveries afterward; to regard mere learning as subordinate to the development of a well-rounded, solid, moral, and intellectual character; as the first and great thing, to supply vigorous, intelligent, God-fearing clittens for the welfare of the land—H. J. Van Dyke.

ed by The Lamplish THE BEAUTIFUL GIFT

What can a mother give her children
Greater today than this one great thingFaith in an old, sweet, beautiful story,
A star—a stable—a new-born King?

Shining faith in the young lad, Jesus; Lover of high white things was He; Jesus—straight as a Lebanon cedar; Jesus—clean as the winds from the sea.

Faith in the young lad come to manhood;
Jesus, compassionate, tender and true—
Oh, my children — what more glorious
Gift in the world can I give to you?

Carry it high like a lamp in the darkness, Hold it for warmth when the day is cold-Keep it for jay when youth goes singing, -Clasp it for peace when you are old.

What can a mother give her children More than a faith that will not dim? Take it, my dear ones—hold it forever; A lamp for a lifetime—faith in Him.

-Grace Noll Crowell in Toronto Globe

IT IS A SIGNAL HONOR that Belleville District was the only cheese district in Can-ada to produce cheese of improved quality this year.

ALWAYS THE HIGHEST QUALITY the fact that Belleville cheese has even surpassed itself this season means that the cheeseitself this season means that the chees makers of this district are not even satisfie with perfection — they want super-perfec-

THE HUDSON BAY RAILWAY WINTER SCHEDULE IS NOW IN EFFECT, which means that a train will leave for Churchill every three weeks. Miss that train and you means that a train will leave for Churchill every three weeks. Alliss that train and you are really missing something, soys Thomas Richard Henry in Toronto Telegrom. But who are we to talk, soys T. R. H. One train every three weeks is just about one train every three weeks is just about one train every three weeks soone than leaves for the Ontario seport of Moosanee, to which point George S. Henry built a railroad. The T. & N. O. R. yestersion to Moosenee was that a little allite. S. Henry built a railroad. The T. & N. Q. Ry extension to Moosenee was just a little sillier, if possible, than the Hudson Bay line to Churchill. Two boots for the sessor, one train every three weeks, and two rusting rails running through the muskep—and we wonder the Germans putting with Hitler, sourcestically remarks Thoylas Richard Henry in his spicy column in the Tely.

The days of engaging those who want to try life insurance selling are a thing of the past. We accept only those who we believe aim to make the business a lifelong career and who rate high in the necessary qualifica tions for success.

There has been an improvement of 35% in the average production of London Life representatives in the past five years. This record applies to an organization of 1,130

Two facts, (1) the high calibre of London Life representatives, and (2) the low net cost to policyholders of its insurance, constitute asons to select this Company for your next life insurance.

TELEPHONE TALKS IN THE WATSON

Mrs. Watson is merely naming the important people she reaches by telephone - some of them every day-saving endless delays, needless risks and many tiresome journeys. And her case is typical of thousands of households. The telephone is so much a part of the daily routine that its importance is often overlooked-until, like Mrs. Watson, you actually start to check up on what it does for you.

The rates for residence tele one service are surprisingly

only a few cents a day,

THE CHICK-A-DEE

Happy Blithesome little bird Feeling nought of fear, Though the north wind's voice is heard And the winter's near, Chipring in the apple tree Not a note in minor key, Happy-hearted chick-a-dee!

Autumn leaves are falling fast,

Ragged leaves and brown,
How they fear the winter blast
And the tempest's frown?*
Fragile though thy form may be
Winter holds no fear for thee,
Happy-hearted chick-a-dee!

Autumn leaves were brown and sere On a sambre day, But thy pretty presence near

Made my spirit gay; Up and down upon the tree Courage came from you to me, As you sand, O chick-a-dee!
